CHEMICO-BIOLOGICAL INTERACTIONS

SUBJECT INDEX

VOLUME 77 (1991)

Adenine *N*-1-oxide, 5-hydroxymethyluracil, 8-hydroxyguanine, oxidative DNA modifications, electrochemical detection, ^{32}P-postlabeling assay, 187
ADP-ribosylation, mitochondria, calcium, prooxidants, cell killing, apoptosis, proliferation, 1
Alkaline unwinding, viscometry, nucleoid sedimentation, thymocytes, splenocytes, chromatin-interactive agents, 25
Alkylation, aromatic nitrogen mustards, nucleic acids, entropy of activation, association constants, binding, 223
Ames assay, MNDO, PM3, chlorofluoranthene, bromomethylfluoranthene, 291
Aniline, *N*-nitrosamine, metabolism, *N*-nitroso-*N*-methylaniline, denitrosation, cytochrome *P*-450, *N*-methylaniline, 81
Anthracycline antibiotics, synthetic quinone, oligonucleotide derivatives, complementary complexes, OH radical, spin trapping, 325
Antileukemic, spectroscopy, Pt(II)-pentamidine, 341
Antioxidant, captopril, reperfusion injury, hydroxyl radical, superoxide, hypochlorous acid, 303
Antioxidant capacity, thyroid hormones, propylthiouracil, lipid peroxidation, free radicals, brain homogenate autoxidation, erythrocyte plasma membrane autoxidation, 173
Apoptosis, mitochondria, calcium, prooxidants, ADP-ribosylation, cell killing, proliferation, 1
Aromatic nitrogen mustards, nucleic acids, entropy of activation, alkylation, association constants, binding, 223
Association constants, aromatic nitrogen mustards, nucleic acids, entropy of activation, alkylation, binding, 223

Benzoquinoneimines, fluoroanilines, ^{19}F-NMR, biotransformation, bioactivation, in vitro, in vivo, 263
Bilirubin glucuronidation, UDP-glucuronosyltransferases, enzyme induction, perfluorodecanoic acid, peroxisome proliferation, 97
Binding, aromatic nitrogen mustards, nucleic acids, entropy of activation, alkylation, association constants, 223
Binding protein, 4,4′-bis([^{3}H]methylsulfonyl)-2,2′5,5′-tetrachlorobiphenyl, fatty-acid-binding protein (FABP), intestinal mucosa, toxicity, 35
4,4′-Bis([^{3}H]methylsulfonyl)-2,2′5,5′-tetrachlorobiphenyl, fatty-acid-binding protein (FABP), intestinal mucosa, binding protein, toxicity, 315
Bioactivation, fluoroanilines, benzoquinoneimines, ^{19}F-NMR, biotransformation, in vitro, in vivo, 263
Bioactivation, nephrotoxicity, glutathione conjugation, transport, 107
Bioalkylation, cytosol, methyl-substitution, subcutaneous, biooxidation, metabolism, 203
Biooxidation, bioalkylation, cytosol, methyl-substitution, subcutaneous, metabolism, 203
Biotransformation, fluoroanilines, benzoquinoneimines, ^{19}F-NMR, bioactivation, in vitro, in vivo, 263
Brain homogenate autoxidation, thyroid hormones, propylthiouracil, antioxidant capacity, lipid peroxidation, free radicals, erythrocyte plasma membrane autoxidation, 173
Bromomethylfluoranthene, Ames assay, MNDO, PM3, chlorofluoranthene, 291

C-nitroso aromatics, lipid peroxidation, 63
C8-aminobiphenylguanine, postlabeling, $N1$,N^2-ethenoguanine, $N1$,N^2-propanoguanines, DNA adducts, T_4 polynucleotide kinase, 51
Calcium, mitochondria, prooxidants, ADP-ribosylation, cell killing, apoptosis, proliferation, 1
Captopril, antioxidant, reperfusion injury, hydroxyl radical, superoxide, hypochlorous acid, 303

2-Carboxybenzaldehyde reductase, liver cells, primary culture, glutathione, phenobarbital, methionine, 149
Cell killing, mitochondria, calcium, prooxidants, ADP-ribosylation, apoptosis, proliferation, 1
Chemical-induced interference, hepatocellular transport, cholestasis, 245
Chlorofluoranthene, Ames assay, MNDO, PM3, bromomethylfluoranthene, 291
Cholestasis, chemical-induced interference, hepatocellular transport, 245
Chromatin-interactive agents, viscometry, nucleoid sedimentation, alkaline unwinding, thymocytes, splenocytes, 25
Complementary complexes, anthracycline antibiotics, synthetic quinone, oligonucleotide derivatives, OH radical, spin trapping, 325
Cytochrome *P*-450, *N*-nitrosamine, metabolism, *N*-nitroso-*N*-methylaniline, denitrosation, *N*-methylaniline, aniline, 81
Cytosol, bioalkylation, methyl-substitution, subcutaneous, biooxidation, metabolism, 203
Cytotoxicity, eugenol, hepatocytes, glutathione, quinone methide, 137

Denitrosation, *N*-nitrosamine, metabolism, *N*-nitroso-*N*-methylaniline, cytochrome *P*-450, *N*-methylaniline, aniline, 81
DNA, electron spin resonance, phenothiazine, phenoxathiin, free radicals, intercalation, 283
DNA adducts, postlabeling, $N1,N^2$-ethenoguanine, $N1,N^2$-propanoguanines, C8-aminobiphenylguanine, T_4 polynucleotide kinase, 51
DNA adducts, postlabeling, styrene, labeling efficiency, T_4 polynucleotide kinase, 39
DNA modification, mutagenicity, proreactive intermediates, halovinyl 2-nitrophenyl, 159

Electrochemical detection, adenine *N*-1-oxide, 5-hydroxymethyluracil, 8-hydroxyguanine, oxidative DNA modifications, ^{32}P-postlabeling assay, 187
Electron spin resonance, DNA, phenothiazine, phenoxathiin, free radicals, intercalation, 283
Entropy of activation, aromatic nitrogen mustards, nucleic acids, alkylation, association constants, binding, 223
Enzyme induction, UDP-glucuronosyltransferases, bilirubin glucuronidation, perfluorodecanoic acid, peroxisome proliferation, 97
Erythrocyte plasma membrane autoxidation, thyroid hormones, propylthiouracil, antioxidant capacity, lipid peroxidation, free radicals, brain homogenate autoxidation, 173

$N1,N^2$-Ethenoguanine, postlabeling, $N1,N^2$-propanoguanines, C8-aminobiphenylguanine, DNA adducts, T_4 polynucleotide kinase, 51
Eugenol, hepatocytes, cytotoxicity, glutathione, quinone methide, 137

^{19}F-NMR, fluoroanilines, benzoquinoneimines, biotransformation, bioactivation, in vitro, in vivo, 263
Fatty-acid-binding protein (FABP), 4,4′-bis-([^{3}H]methylsulfonyl)-2,2′5,5′-tetrachlorobiphenyl, intestinal mucosa, binding protein, toxicity, 315
Fluoroanilines, benzoquinoneimines, ^{19}F-NMR, biotransformation, bioactivation, in vitro, in vivo, 263
Free radicals, electron spin resonance, DNA, phenothiazine, phenoxathiin, intercalation, 283
Free radicals, thyroid hormones, propylthiouracil, antioxidant capacity, lipid peroxidation, brain homogenate autoxidation, erythrocyte plasma membrane autoxidation, 173

Glutathione, 2-carboxybenzaldehyde reductase, liver cells, primary culture, phenobarbital, methionine, 149
Glutathione, eugenol, hepatocytes, cytotoxicity, quinone methide, 137
Glutathione conjugation, nephrotoxicity, bioactivation, transport, 107

Halovinyl 2-nitrophenyl, mutagenicity, DNA modification, proreactive intermediates, 159
Hepatocellular transport, chemical-induced interference, cholestasis, 245
Hepatocytes, eugenol, cytotoxicity, glutathione, quinone methide, 137
8-Hydroxyguanine, adenine *N*-1-oxide, 5-hydroxymethyluracil, oxidative DNA modifications, electrochemical detection, ^{32}P-postlabeling assay, 187
Hydroxyl radical, captopril, antioxidant, reperfusion injury, superoxide, hypochlorous acid, 303
5-Hydroxymethyluracil, adenine *N*-1-oxide, 8-hydroxyguanine, oxidative DNA modifications, electrochemical detection, ^{32}P-postlabeling assay, 187
Hypochlorous acid, captopril, antioxidant, reperfusion injury, hydroxyl radical, superoxide, 303

Intercalation, electron spin resonance, DNA, phenothiazine, phenoxathiin, free radicals, 283
Intestinal mucosa, 4,4′-bis([^{3}H]methylsulfonyl) -2,2′5,5′- tetrachlorobiphenyl, fatty-acid-binding protein (FABP), binding protein, toxicity, 315
In vitro, fluoroanilines, benzoquinoneimines, ^{19}F-NMR, biotransformation, bioactivation, in vivo, 263
In vivo, fluoroanilines, benzoquinoneimines, ^{19}F-NMR, biotransformation, bioactivation, in vitro, 263

Labeling efficiency, postlabeling, DNA adducts, styrene, T_4 polynucleotide kinase, 39
Lipid peroxidation, C-nitroso aromatics, 63
Lipid peroxidation, thyroid hormones, propylthiouracil, antioxidant capacity, free radicals, brain homogenate autoxidation, erythrocyte plasma membrane autoxidation, 173
Liver cells, 2-carboxybenzaldehyde reductase, primary culture, glutathione, phenobarbital, methionine, 149

Metabolism, bioalkylation, cytosol, methyl-substitution, subcutaneous, biooxidation, 203
Metabolism, *N*-nitrosamine, *N*-nitroso-*N*-methylaniline, denitrosation, cytochrome *P*-450, *N*-methylaniline, aniline, 81
Methionine, 2-carboxybenzaldehyde reductase, liver cells, primary culture, glutathione, phenobarbital, 149
Methyl-substitution, bioalkylation, cytosol, subcutaneous, biooxidation, metabolism, 203
Mitochondria, calcium, prooxidants, ADP-ribosylation, cell killing, apoptosis, proliferation, 1
MNDO, Ames assay, PM3, chlorofluoranthene, bromomethylfluoranthene, 291
Mutagenicity, DNA modification, proreactive intermediates, halovinyl 2-nitrophenyl, 159

N-Methylaniline, *N*-nitrosamine, metabolism, *N*-nitroso-*N*-methylaniline, denitrosation, cytochrome *P*-450, aniline, 81
N-Nitrosamine, metabolism, *N*-nitroso-*N*-methylaniline, denitrosation, cytochrome *P*-450, *N*-methylaniline, aniline, 81
N-Nitroso-*N*-methylaniline, *N*-nitrosamine, metabolism, denitrosation, cytochrome *P*-450, *N*-methylaniline, aniline, 81
Nephrotoxicity, glutathione conjugation, bioactivation, transport, 107
Nucleic acids, aromatic nitrogen mustards, entropy of activation, alkylation, association constants, binding, 223
Nucleoid sedimentation, viscometry, alkaline unwinding, thymocytes, splenocytes, chromatin-interactive agents, 25

OH radical, anthracycline antibiotics, synthetic quinone, oligonucleotide derivatives, complementary complexes, spin trapping, 325
Oligonucleotide derivatives, anthracycline antibiotics, synthetic quinone, complementary complexes, OH radical, spin trapping, 325
Oxidative DNA modifications, adenine *N*-1-oxide, 5-hydroxymethyluracil, 8-hydroxyguanine, electrochemical detection, ^{32}P-postlabeling assay, 187

Perfluorodecanoic acid, UDP-glucuronosyltransferases, bilirubin glucuronidation, enzyme induction, peroxisome proliferation, 97
Peroxisome proliferation, UDP-glucuronosyltransferases, bilirubin glucuronidation, enzyme induction, perfluorodecanoic acid, 97
Phenobarbital, 2-carboxybenzaldehyde reductase, liver cells, primary culture, glutathione, methionine, 149
Phenothiazine, electron spin resonance, DNA, phenoxathiin, free radicals, intercalation, 283
Phenoxathiin, electron spin resonance, DNA, phenothiazine, free radicals, intercalation, 283
PM3, Ames assay, MNDO, chlorofluoranthene, bromomethylfluoranthene, 291
Postlabeling, DNA adducts, styrene, labeling efficiency, T_4 polynucleotide kinase, 39
Postlabeling, *N*1,*N*^{2}-ethenoguanine, *N*1,*N*^{2}-propanoguanines, C8-aminobiphenylguanine, DNA adducts, T_4 polynucleotide kinase, 51
^{32}P-Postlabeling assay, adenine *N*-1-oxide, 5-hydroxymethyluracil, 8-hydroxyguanine, oxidative DNA modifications, electrochemical detection, 187
Primary culture, 2-carboxybenzaldehyde reductase, liver cells, glutathione, phenobarbital, methionine, 149
Proliferation, mitochondria, calcium, prooxidants, ADP-ribosylation, cell killing, apoptosis, 1
Prooxidants, mitochondria, calcium, ADP-ribosylation, cell killing, apoptosis, proliferation, 1
*N*1,*N*^{2}-Propanoguanines, postlabeling, *N*1,*N*^{2}-ethenoguanine, C8-aminobiphenylguanine, DNA adducts, T_4 polynucleotide kinase, 51

Propylthiouracil, thyroid hormones, antioxidant capacity, lipid peroxidation, free radicals, brain homogenate autoxidation, erythrocyte plasma membrane autoxidation, 173
Proreactive intermediates, mutagenicity, DNA modification, halovinyl 2-nitrophenyl, 159
Pt(II)-pentamidine, spectroscopy, antileukemic, 341

Quinone methide, eugenol, hepatocytes, cytotoxicity, glutathione, 137

Reperfusion injury, captopril, antioxidant, hydroxyl radical, superoxide, hypochlorous acid, 303

Spectroscopy, Pt(II)-pentamidine, antileukemic, 341
Spin trapping, anthracycline antibiotics, synthetic quinone, oligonucleotide derivatives, complementary complexes, OH radical, 325
Splenocytes, viscometry, nucleoid sedimentation, alkaline unwinding, thymocytes, chromatin-interactive agents, 25
Styrene, postlabeling, DNA adducts, labeling efficiency, T_4 polynucleotide kinase, 39
Subcutaneous, bioalkylation, cytosol, methyl-substitution, biooxidation, metabolism, 203
Superoxide, captopril, antioxidant, reperfusion injury, hydroxyl radical, hypochlorous acid, 303
Synthetic quinone, anthracycline antibiotics, oligonucleotide derivatives, complementary complexes, OH radical, spin trapping, 325

T_4 polynucleotide kinase, postlabeling, $N1,N^2$-ethenoguanine, $N1,N^2$-propanoguanines, C8-aminobiphenylguanine, DNA adducts, 51
T_4 polynucleotide kinase, postlabeling, DNA adducts, styrene, labeling efficiency, 39
Thymocytes, viscometry, nucleoid sedimentation, alkaline unwinding, splenocytes, chromatin-interactive agents, 25
Thyroid hormones, propylthiouracil, antioxidant capacity, lipid peroxidation, free radicals, brain homogenate autoxidation, erythrocyte plasma membrane autoxidation, 173
Toxicity, 4,4′-bis([^{3}H]methylsulfonyl)-2,2′5,5′-tetrachlorobiphenyl, fatty-acid-binding protein (FABP), intestinal mucosa, binding protein, 315
Transport, nephrotoxicity, glutathione conjugation, bioactivation, 107

UDP-glucuronosyltransferases, bilirubin glucuronidation, enzyme induction, perfluorodecanoic acid, peroxisome proliferation, 97

Viscometry, nucleoid sedimentation, alkaline unwinding, thymocytes, splenocytes, chromatin-interactive agents, 25
